Portfolio: rabinshah.info

Carrier Objectives

With a Bachelor of Information Technology in hand, a motivated, energetic, and enthusiastic graduate seeking a position as a Graduate Frontend Developer. With industry relevant experience as Web and Software Developer, I can bring my programming skills, ability in understanding complex business functionality, problem-solving skills and teamwork expertise to improve performance and to accelerate digital transformation in the resources sector. My core skills are HTML, CSS, JavaScript, Bootstrap, ReactJS, NodeJS, Express, Java, PostgreSQL, MongoDb and Git. I am seeking to gain opportunities to grow and expand my skill set through using new technologies, getting mentor by highly accomplished team of experts and challenging career in a successful organization.

Skills

Technical Skills
- ➢ Frontend: HTML5, CSS3, ReactJS, Bootstrap
- ➢ Programming Languages: JavaScript, Java
- ➢ Backend: NodeJS, Express
- ➢ Database: MongoDB, PostgreSQL, MySQL, MS SQL Server management Studio
- ➢ Tools: Git, Jira, Visual Studio Code, Intellij, Android Studio, WordPress, npm
- ➢ Other Skills: Testing and Debugging, fixing bugs, Microsoft excel

Soft Skills
- ➢ Strong problem-solving and critical-thinking with a solution focused mindset abilities
- ➢ Effective communication and collaboration in cross-functional teams
- ➢ Adaptable and quick to learn new technologies
- ➢ Ability to do multitasking function and have attention to detail mindset

Education

Professional Year: - March 2023 - Present
QIBA, Sydney, NSW
Bachelor's degree of Information Technology: - July 2020 - Sep 2022
Victoria University, Sydney, NSW
Diploma & Advanced Diploma of Information Technology: - May 2017 - June 2020
Kingston Institute Australia

Projects

Weather Forecast: - https://weather-forecast-pearl.vercel.app
Movie Collection - https://movie-finder-api.vercel.app/
- Created intuitive, responsive, user-friendly interface displaying features such as current weather conditions, hourly forecasts, and a 7-day outlook in **weather Forecast** app.

- Utilized HTML, CSS, JavaScript, Bootstrap, and ReactJS to design, maintain an engaging and visually appealing user experience UI.
- Implemented software engineering principles, design patterns to build and to make ensure high reliability, performance, and user satisfaction application
- Integrated weather data APIs to fetch and display location-specific weather information in **Weather Forecast** app.
- Integrated Movie APIs to fetch and display movies for users in **Movie Collection** app.
- Ensured responsiveness and cross-browser compatibility, optimizing and best practices the site for various devices.

Prank calculator - https://prank-calculator-95obhprwd-rabins-projects.vercel.app/

Unit Converter - https://unitconverter-five.vercel.app/

- Utilized npm packages to convert measurement from one unit to another unit in the **Unit Converter** app.
- Ensured responsiveness and cross-browser compatibility, optimizing the site for various devices.
- Deployed the application using vercel, ensuring seamless performance and accessibility.
- Implemented industry-standard programming languages, frameworks, and tools to develop clean, efficient, and maintainable code.
- Implemented React.js to build dynamic components, improving website interactivity and user experience.

Not Todo List - https://tasklist-o98r.onrender.com/

- Designed and implemented RESTful API to store and manage website content into Mongo database, ensuring efficient data retrieval and storage.
- Implemented a responsive front-end using React to enable intuitive task management functionalities and user interaction.
- Utilized MongoDB for efficient data storage, ensuring seamless retrieval and persistence of task-related information.
- Utilized Git for version control systems and to manage the coding.
- Designed and implemented the server-side functionality using Node.js and Express.js, enabling robust API endpoints for data manipulation and interaction with the database.
- Implemented CRUD (Create, Read, Update, and Delete) operations to perform task management.

Job Ready Program at Dented Code

Job-ready program participant in an employment-based skills assessment program at Dented Code, developing industry capabilities in HTML, CSS, JavaScript, React.js, Node.js, and MongoDB. I am dedicating to advancing my proficiency in web development technologies and industry best practices. This program focuses on honing technical credentials.
